THE FOUNDATION OF EV GROWTH

THE COMPACT PAIRING YOU'VE BEEN WAITING FOR

- Engineered specifically for the Tesla Commercial pedestal to create a seamless, flush-mount appearance
- Lightweight for easy handling and rapid deployment without heavy machinery
- Significantly minimizes labor time and eliminates the curing delays of cast-in-place alternatives
- A robust solution engineered to optimize performance and resist design wind speeds in excess of 170 mph
- Produced in a controlled environment and available when you need it

TESLA COMMERCIAL PEDESTAL

Product Dimensions:
6" x 2" x 47" tall

Approximate Weight:
15 pounds

EV BLOCK - COMPACT

Product Dimensions:
12" x 12" x 16" tall

Approximate Weight:
175 pounds

1 TESLA COMMERCIAL PEDESTAL:

- Rugged, reliable, and cost effective solution for high-performance EV charging
- Widely usable by a broad range of EVs, with compatibility for Tesla Gen 3 and Gen 2 Universal Wall Connectors
- Supports single or dual mount configurations

2 COMPACT FOUNDATION:

- Two side openings and enlarged bottom entry to support multiple conduit configurations
- Can be fitted with optional cover plate for future-proofing applications
- Lightweight and specifically engineered to support the Tesla Commercial pedestal
- Delivers a clean, flush-mounted appearance with tailored upper recess and pre-located anchor points

Engineered for effortless integration, the EV Block Compact delivers a ready-to-deploy and complete site solution when paired with the Tesla Commercial pedestal.
